Testing Angular 4 (previously
Angular 2) Apps with Jasmine
Introduction to JavaScript Security
LFS184

Alison Rafael Marinho Gonçalves

Full-Stack Engineer | Delivering High-Impact Products | Turning
Complex Problems into Scalable Solutions
Pouso Alegre, Minas Gerais, Brazil

Experience

BairesDev

Principal Software Engineer
September 2021 - Present (5 years)
San Francisco, California, United States

Dedicated to the wemlo (RE/MAX) project since joining the company, serving as a key contributor across platform reliability, scalability, and integrations. Led performance optimization initiatives that reduced critical endpoint response times from seconds to milliseconds through load testing and system improvements. Re-architected the file management framework to support data streaming, reducing memory consumption and infrastructure costs. Acted as technical lead for multiple complex third-party integrations, while driving SRE practices, code reviews, and deployment excellence to ensure platform stability and growth.

labsit

Senior Software Engineer
August 2020 - September 2021 (1 year 2 months)
São Paulo, Brazil

At LABSIT, I focused on web application development as a frontend engineer, where I played a pivotal role in creating an Angular library that significantly improved development efficiency. Leading a squad, I was responsible for task delegation, architectural decisions, and code reviews, ensuring high-quality deliverables. My experience here has honed my leadership and technical skills in a dynamic environment of an established company.

TECLA

Software Engineer
September 2020 - December 2020 (4 months)
Seattle, WA

At TECLA, I contributed to the development of a web-based mental health system, focusing on migrating a legacy system to modern web technologies. My experience included participating in agile Scrum practices and completing

HIPAA training to ensure compliance. Although my tenure was brief, it was an enriching opportunity that enhanced my skills in web application development and teamwork.

Inatel Competence Center

4 years 3 months

Software Engineer

February 2018 - August 2020 (2 years 7 months)

Santa Rita do Sapucaí, MG

At Inatel Competence Center, I have played a pivotal role in developing web applications tailored for Telecom product management. My focus has been on enhancing user experience and ensuring efficient functionality. Working closely with cross-functional teams, I have contributed to the seamless integration of features while continuously improving my skills in frontend development.

Software Development Intern

March 2017 - February 2018 (1 year)

Santa Rita do Sapucaí, Minas Gerais

I designed and implemented an IoT platform from scratch, capable of handling thousands of requests per hour and supporting multiple communication protocols such as HTTP, CoAP, and MQTT. To validate the solution, we integrated devices across the INATEL campus. This allowed me to develop a comprehensive application that enabled real-time visualization

Software Development Intern

June 2016 - February 2017 (9 months)

Santa Rita do Sapucaí, MG

Validated potential projects, contributing to accurate project estimations and proof of concepts to ensure feasibility. Researched and summarized new frameworks and technologies, providing valuable insights to senior engineers. Enhanced project validation efficiency, reducing validation time thorough analysis and innovative approaches.

Education

Universidade do Vale do Sapucaí - UNIVÁS

Bachelor of Science, Information Technology · (January 2014 - December 2017)
